# # Embryos Selling

Donor: **Dolly Python 7061**

A Leading Young Daughter of Meyer 734 & Grizz 950

**Donor dam to the Embryos Selling - Dolly Python 7061**

**Grandam to the Embryos Selling - Collins Grizz 950**

**SELLING: A. 1 Package of 3 Embryos by Heat Wave; B. 1 Package of 3 Embryos by Heat Wave  
C. 1 Package of 3 Embryos by Irish Whiskey**

- Dolly Python is a leading donor in the DeRouche Cattle Company donor line-up. She is perhaps one if not the most exciting daughter of Collins Grizz 950, the cloned daughter of GCC Grizz that has produced near \$200,000.00 in Meyer 734 progeny alone. These SimAngus has tremendous look, style and lots of hip and muscle shape. Dolly Python is a stinger. She has all the phenotype to allow her to produce top selling steer prospect and all the maternal traits and pedigree to make her a valuable donor replacement producer!
- The Heat Wave x Meyer - Grizz 950 mating is proven. Many top selling steers have been generated out of this cross, they consistently sell high and feed well to the end. The Heat Wave daughters with the added maternal influence on the dam's side are extra special as well.
- We are very excited about the Irish Whiskey mating to Dolly Python. Reports indicate that the Whiskey daughters out of Meyer-Grizz 950 females are consistently working great to Monopoly and Heat Wave. Meyer adds consistency! These Maine Simm influenced donors are big hiped, good bodied, right sized and long necked.
- This is a valuable lot backed with lots of pedigree and quality, only offered through DeRouchey or Embryos on Snow. Take advantage!

Offered by: **DeRouchey Cattle Co., Fred and Joan DeRouchey & Family, Mitchell, SD,
